SAKPRO - THE ONLY PRODUCT FARMERS ASK FOR BY NAME TO DELIVER THEIR PRODUCE SAFELY, EVERY TIME.

Sakpro is Southern Africa's leading manufacturer and supplier of synthetic knitted HDPE bags with a wide range of uses in the agricultural and civil engineering industries.

These premium bags have been manufactured by Sakpro and used in the South African domestic market since 1964. The quality of all the bags produced by Sakpro is of the highest standard worldwide, and the bags are designed to meet customer demands and satisfaction

CELEBRATING OUR FSSC2200 CERTIFICATION!

SAKPRO SETS THE BAR IN QUALITY, CONSISTENCY, INNOVATION AND SERVICE.

We manufacture and market a comprehensive range of strong, colourful HDPE knitted bags ideally suited for the packaging of various fruits and vegetables.

At Sakpro we are constantly driven to deliver high quality products and finding new ways to serve you better as a trusted brand name in the packaging industry. As we celebrate the achievement of our factory's FSSC 22000 certification, we can't help but take a moment to appreciate those who contributed to our success.

It is with our clients and the consumers in mind that we aspire to be the best. So from our team here at Sakpro, we would like to say thank you for inspiring us to new heights so that we can serve you better!

At Sakpro we strive to give our customers a variety of choice when it comes to the colour and size of bags available to the fresh produce industry. Our manufacturing structure allows clients to add their own personalized branding to the bags. Sizes and colours can also be customized according to client specifications.

What is FSSC22000 and what does it mean in the food industry?

Based on the International Organization for Standardization (ISO) standards, FSSC 22000 is a Global Food Safety Initiative (GFSI), that is also supported by the European Food and Drink Association (CIAA) and the American Groceries Manufacturing Association (GMA). The focus is to assure food safety by defining, evaluating, and controlling risks and hazards during our processing and product manufacturing.

Sakpro bags are thus safe to use in the food industry as a packaging solution to move your fresh produce from the market to the end-user. Many of our customers use strict food safety measurements in their processes which makes Sakpro the best solution as our products fall under these food safety regulations with FSSC22000.

At Sakpro we are dedicated to ensuring food safety along the entire food chain from production to consumption.

ADDING THE FSSC LABEL TO YOUR PRODUCT:

The manufacture of safe packaging and packaging materials is a critical part of ensuring the food supply chain's integrity and safety. The packaging for food and feed has many essential functions: protecting its contents against contamination or damage, leakage or loss, providing a showcase for the marketing of the product to the consumer, and the provision of required product information.

FSSC 22000 Certification assist us in maintaining current customers as well as opening a larger market for increased market opportunities. The market is becoming stricter about their regulations and standards due to general health issues regarding food. Countries across the globe are making changes to food safety regulations because food is imported internationally.

Traceability plays a large role in this regard. Large retailers and multinational manufacturers or processors are demanding certification of their suppliers. Having FSSC Certification means you are qualified to supply these organizations or their supplier's safe products.

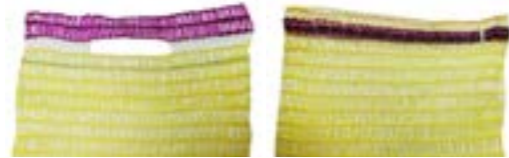

As a food safe manufacturing company, we will continue to have an ongoing focus on improvement of our system as it creates trust in our company and opens doors internationally for future business opportunities.
